Issue # 123

April - May 2011

CP9: As reported in earlier newsletters, we have made a special buy on CP9 and have large quantities available at aggressive new price points. Sales are increasing dramatically on this model with retail price drops. Please make sure your pricing is in line and let us know if you have any ideas for volume sales opportunities. Contact your rep for new/lowest pricing.

CP9 and waterproof housing

Wearable/Xtreme Sport Cameras: This category has exploded recently and many new suppliers are entering the market. We have a very interesting camera product in development and will advise further details in next months newsletter. Of perhaps equal interest is the accessory range we will introduce. Current wearable camera accessories are designed to fit their specific cameras only. Most major camera manufacturers have their own waterproof sports models with video capacity. Our range of mounting accessories (coming soon) are designed to work with all major brands. Universal mounts for handlebar, helmet, chest, arm, surf-board, car and more. Stay tuned for details on this exciting and profitable new category.

Helmet Mount

Helmet Mounts: Back by popular demand. We have reintroduced the universal helmet mount.

SS 3000: A limited number of 3MP, waterproof with flash Snap Sights cameras are available. First come first served. Ask your rep for pricing on this model.

SS 3000

Quality: A great testament to the quality of our torches is the story of a customer who lost her light in the Sea of Cortez and returned 6 months later to find it. Amazingly, once the switch was cleaned of marine growth, the torch turned on (with existing batteries) and works well to this day.
