Issue # 107

July 2009

Goodbye to an old friend! The IC 600 has been a great member of the Intova family of products. Introduced in 2007 the IC 600 started as an unprecedented value and has held that position throughout its lifetime. Unfortunately, production on this model is finished and remaining inventory is diminishing quickly. Stay tuned for more model changes as the product line evolves.

Helmet Mounts are now available and provide great opportunities for cross promotion. Xtreme Sports enthusiasts are looking for ways to video their daring escapades. Our helmet mount is a simple quick release, Universal mount for cameras. It attaches via web straps or durable two sided tape and provides great options for bikers, kayakers, skiers, surfers...

Another new item : Coming out this month is the Intova Compact Torch. Similar in beam output to the Nova IFL 660, the Compact torch is powered by 3 AAA batteries and features a new tail switch design. The switch options are Full Power/30% Power and strobe. Bright, sleek and Compact-a sure winner!!!!

Social Networking: We have heard the call and are working hard to become members of the Social Network Society.
